To Shred or Not to Shred?

Worried about giving permission to shred your documents?

Let Rapide take the worry out of your shredding programme. Maybe you shred once a month or once every 3 years. Maybe you are moving premises. It's very worrying when a couple of weeks after you have had material destroyed, you cannot find something. You immediately think, "WAS IT SHREDED?"

Rapide have put aside enough storage space to hold up to 250,000 sacks. This allows you to have your documents collected and stored until a time when you are certain that what was sent should be shredded.

What if during this storage stage, you find that something is needed?

The answer is simple: every item we collect is given a unique barcode reference which is recorded in our database. All you have to do is inform us of the range of numbers you believe might contain the item you are looking for. We will remove these items and place them into one of our customer viewing areas.

Peace of mind when you need it most.

Once you are certain that documents are ready for destruction, just send us a fax, e-mail or letter and we will shred the items and send you your certificate of destruction.

Talk to one of our sales advisors about how we can further assist you.

We make it simple.
